

## Data Sheet

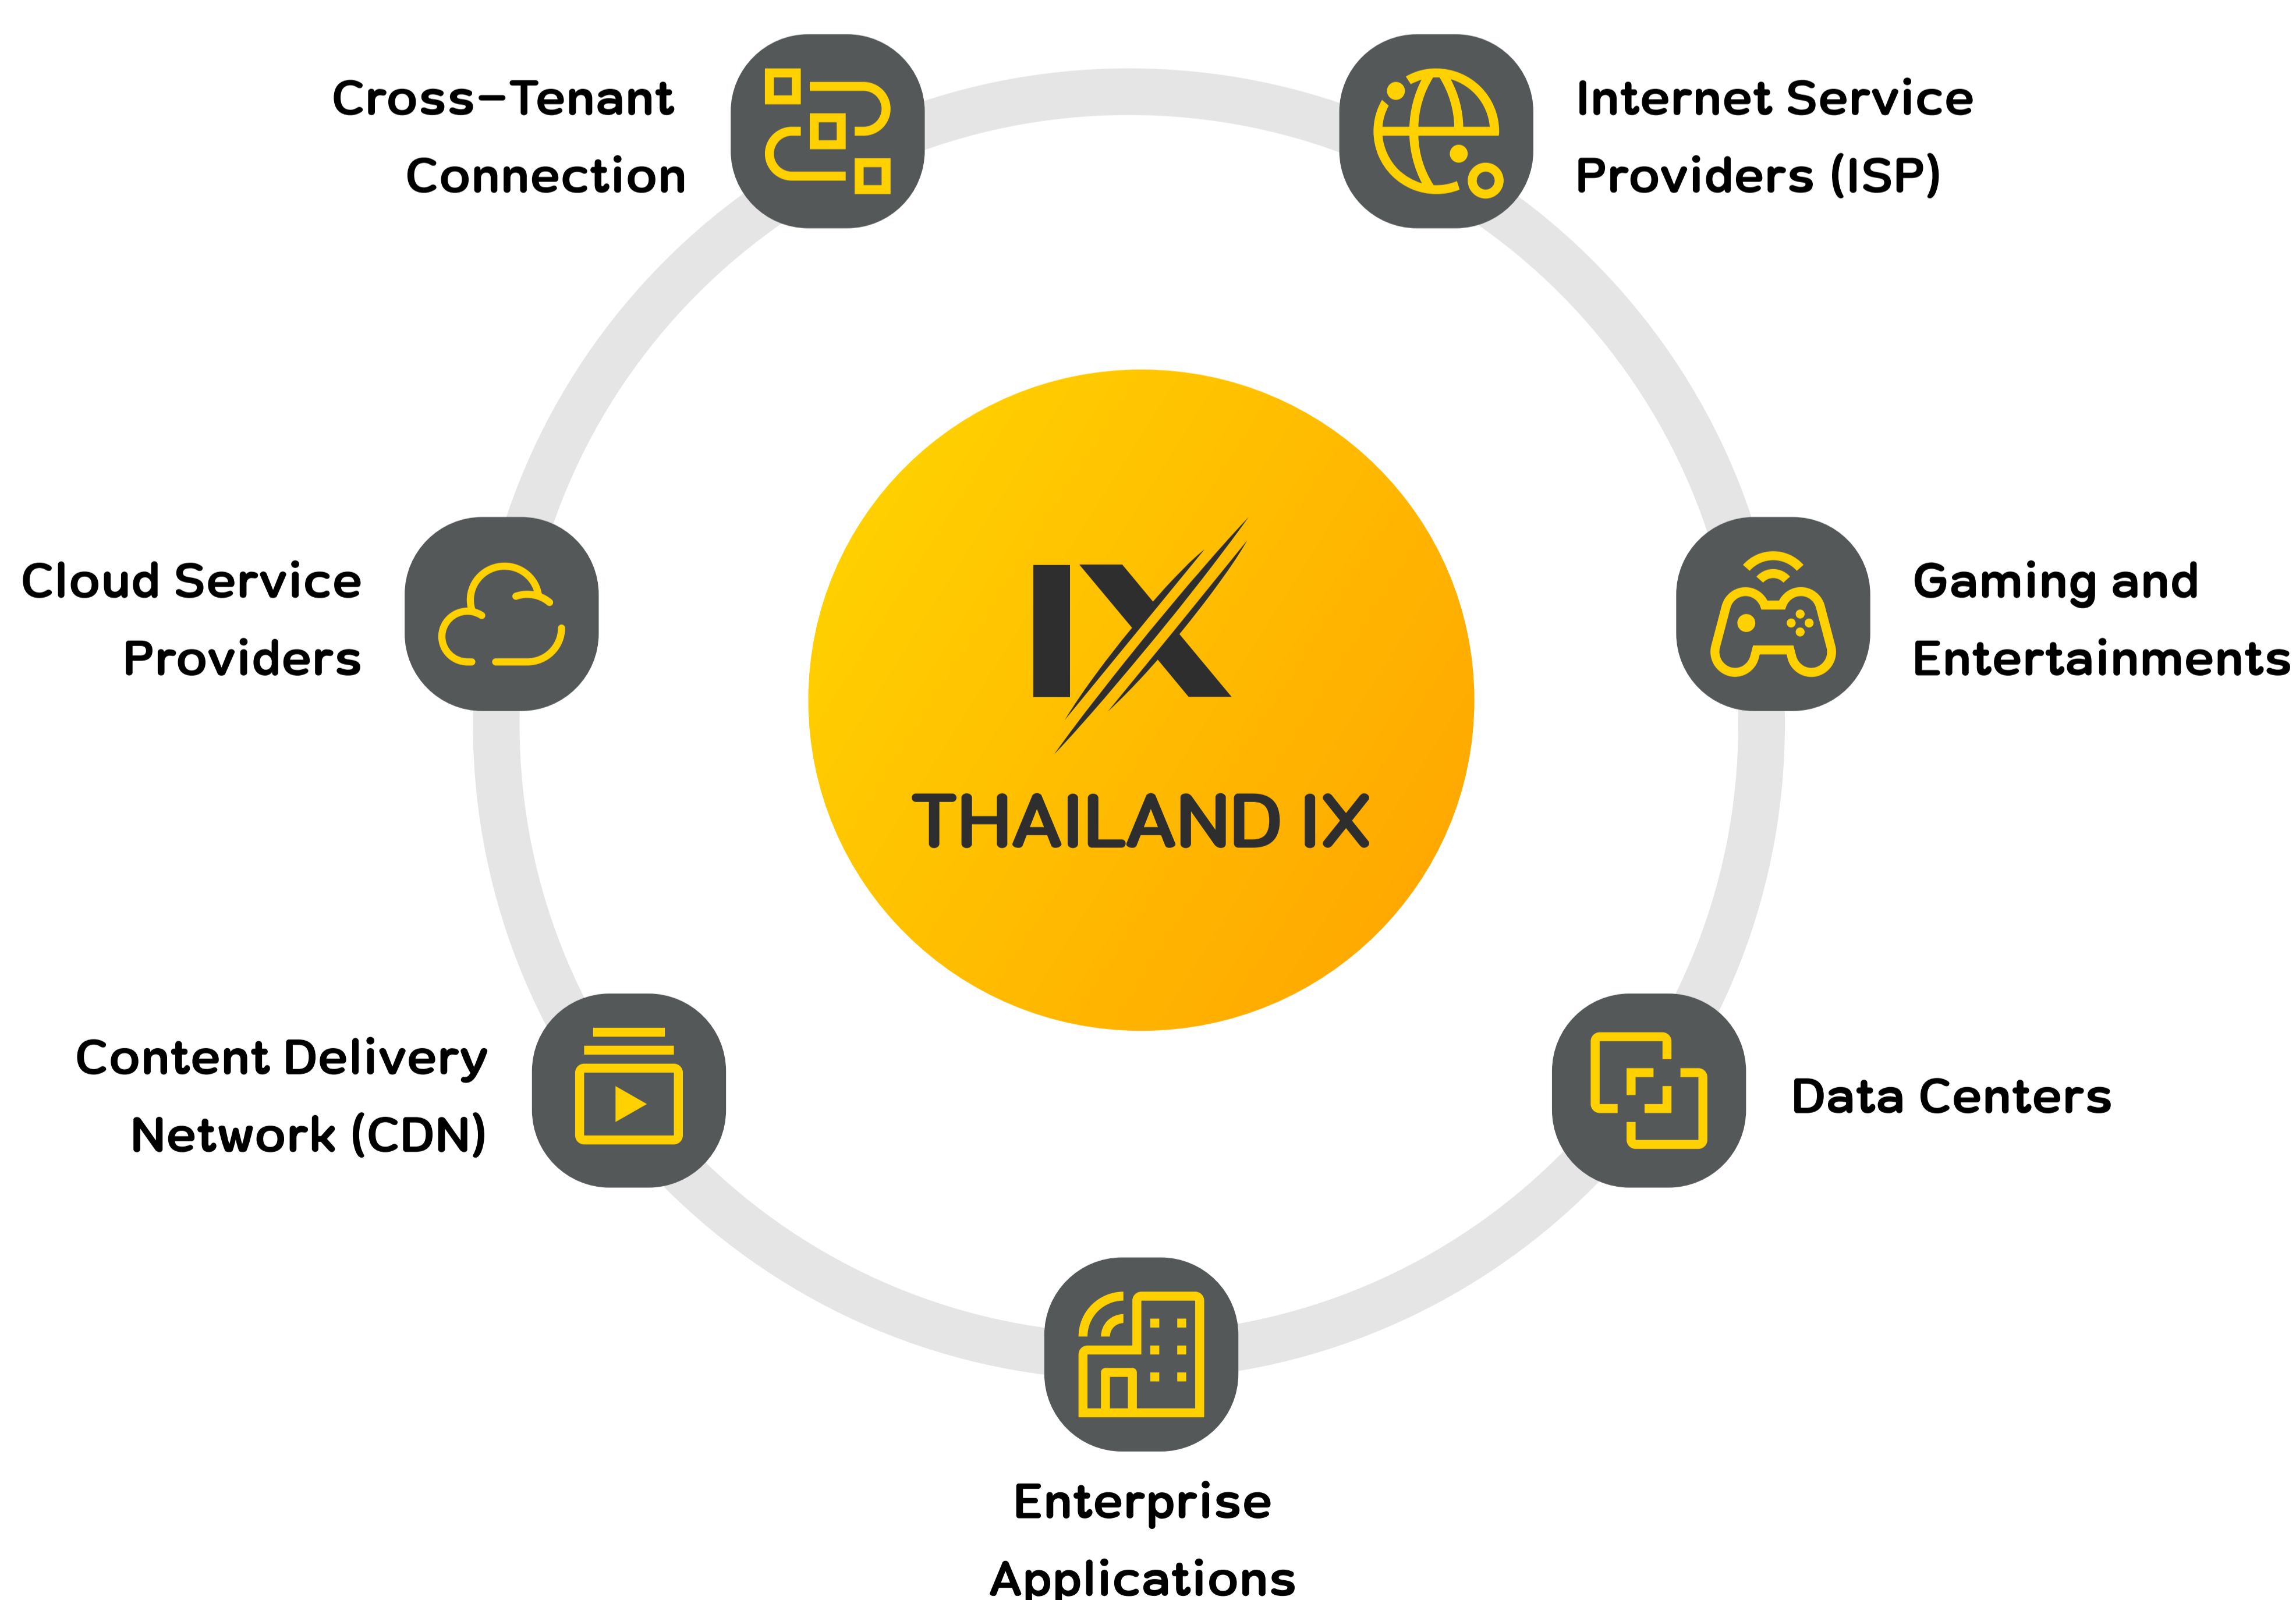

# Connect Your Business, Connect the World

Thailand Internet Exchange is the first and the most admired Neutral Internet Exchange provider in Thailand. For decades, we have been connecting businesses and services from leading providers together, faster, smoother, and easier than ever before.

## Connecting without any compromise

With well-established gateways across 3 leading data centers, the largest international Internet connection, and 24/7 dedicated technical support, we can ensure the stability of your connection.

Today, we are proud to become No. 1 for Internet Exchange providers in Thailand, thanks to support and trust from peering members using our services.

## Benefits

### No Interruption, More Connection

Providing peering services that are always available for 99.99% uptime, connecting to the world with 35 markets, and counting.

### Interconnection

Connecting with the largest peering members in Thailand, ranging from cloud, CDN, to enterprise applications. There is something for everyone.

### Low Latency

Maximizing network performance with highest throughputs network connection and multiple gateways, reducing hopping and congestion for smoothest experience to end-users.

### Low Friction

Establishing connections with ease using widely-adopted standards for connecting with our peering members.

### Low Cost

With our services, you can expect the lower network cost with less hardware requirements, while maintaining highest performance for your application.
